GSCF introduces a new Collections Services portlet

ZUG, SWITZERLAND – GSCF is pleased to announce the launch of its new Collections Services portlet aimed at facilitating the collections exercise of Receivables-based programs.

This new Collection Services portlet, carefully designed by GSCF's product developers with the assistance of experts in the collections field, is now available on GSCF's platform allowing users to easily handle and monitor the collections process of troubled Account Debtors in A/R programs.

Kendall Stevens, President of the Board of Directors, noted: *"Banks and vendors are using credit insurance more than ever, however, they are not always aware of the need of addressing the collections aspect in order to complete the insurance coverage. By adding this new portlet we intend to complete our service offering related to the management of credit-insured portfolio of receivables. This is another example of GSCF anticipating and actively addressing the market's needs."*

For more information on this new feature, please contact GSCF Business Development at business-dev@gscf.com.
